Aastha Garg, AI Engineer

Saharanpur, Uttar Pradesh, India, gargaastha811@gmail.com

POWER STATEMENT

Driven Computer Science student passionate about building AI-powered applications and full-stack solutions. Combines strong problem-solving skills with hands-on project experience in Python, LLMs, RAG, and MERN stack development. Eager to turn innovative ideas into practical solutions and create technology that solves real-world problems.

PROFESSIONAL SUMMARY

Aspiring AI Engineer and Full-Stack Web Developer pursuing B.Tech in Computer Science and Engineering at Shobhit University. Skilled in Python, SQL, JavaScript, MERN stack, and AI technologies, with hands-on experience building projects like an AI Resume Analyzer and CampusPrep. Passionate about building practical applications, exploring LLMs and RAG, and solving real-world problems through technology.

ACCOMPLISHMENTS

- Built an AI Resume Analyzer to compare resumes with job descriptions and calculate matching scores.
- Developed hands-on experience with Python, Pydantic, JSON, and Streamlit through practical AI projects.
- Developing CampusPrep, a placement preparation platform covering DSA, SQL, core CS subjects, aptitude, and HR interview preparation.
- Maintained a strong academic record with a CGPA of 9.08 through the second year of B.Tech.

EDUCATION

Aug 2024 — May 2028	B.Tech CSE, Shobhit University, Gangoh	9.04 cgpa
Apr 2023 — Mar 2024	12th PCM, GeetaGyan Sanskar Academy	83%
Apr 2021 — Mar 2022	10th, GeetaGyan Sanskar Academy	82%

TECHNICAL PROFICIENCIES

Programming Languages:	Python, JavaScript, SQL
Web Development:	MERN Stack, React.js, Node.js, Express.js, MongoDB, REST APIs.
AI Engineering:	LLMs, Retrieval-Augmented Generation (RAG).
Tools & Libraries:	Git, GitHub, VS Code, Jupyter Notebook, Streamlit, Pydantic, JSON.
Core Computer Science:	Data Structures and Algorithms (DSA), DBMS, OOP, Operating Systems, Computer Networks.

PROJECTS

1. **AI Resume Analyzer**

   Technologies: Python, Pydantic, JSON, Streamlit, Groq API

   - Built an AI-powered application to compare candidate resumes with job descriptions.
   - Implemented resume matching to generate a percentage-based match score.
   - Used Pydantic and JSON for structured data handling and validation.
   - Developed an interactive interface using Streamlit.

2. **CampusPrep – Placement Preparation Platform**

   Technologies: React.js, Node.js, Express.js, MongoDB *(if used in your implementation)*

   - Developing a platform to help college students prepare for campus placements.
   - Organizing learning resources for DSA, SQL, core computer science subjects, and aptitude.
   - Including HR interview questions and sample answers to support interview preparation.
   - Aiming to provide students with a centralized platform for technical learning and placement readiness.
